

## CONTENTS

T.V. Shimanskaya, Y.V.Goshovska, V.F. Sagach. Nitric oxide as the main mediator of adaptation to physical training	3
O.I. Voitychuk, V.S. Asmol'kova, N.M. Gula, M.Oz, Y.M. Shuba. The effects of N-stearoyl- and N-oleoylethanolamine on cardiac voltage-dependent sodium channels	13
A. M. Talnov. Correlations of hippocampal theta frequency with conditioned stimuli, motor latency and moving time in rats	23
I.V. Melnick. Electrically silent neurons in substantia gelatinosa of the rat spinal cord	34
T.V. Beregova, Y.V. Eshchenko, V.D. Bovt, V.A. Eshchenko. Zinc and the secretory material content in blood granulocytes and in basal parts of intestine crypts during stress	40
N.E. Lapovets. Cytokines spectrum of blood serum during inflammatory processes in abdominal cavity	45
L.D. Popova, I.M. Vasyl'eva. Testosterone and thyroid hormones levels in rats with submissive and aggressive behavior types	49
S.M. Voronych, B.M Pavlykivs'ka, N.M. Voronych-Semchenko. Physiological aspects of analysis of the indexes of the variability of cardiac rhythm in adolescents with latent hypothyrosis	53
Yu. Koryak. Static stretch training in conditions of simulated microgravity maintains contractile properties of muscles	62
I.V. Brodyak, A.R. Hnatush, N.O. Sybirna. Effect of L-arginine and aminoguanidine system on morphological and physiological characteristics of plasma membranes of blood lymphocytes during experimental diabetes mellitus	77
E.N. Chujan, E.A. Birukova, M.U. Ravaeva. The influence of individually chosen controlled breathing frequency on the heart rate variability indexes	86
<b>REVIEW</b>	
O.A. Fedorenko and S.M. Marchenko. Spontaneously active ion channels of the nuclear envelope membrane	95
O.I. Sukmansky, M.S. Drogomiretska, O.V. Den'ga, I.O. Sukmansky. The glycosaminoglycans role in pathogenesis of atherosclerosis	106
L. Dyugovskaya, A. Polyakov. Neutrophil apoptosis and hypoxia	115
