

Contents

<i>O.V. Akopova, A.V. Kotsiuruba, Yu.P. Tkachenko, V.F. Sagach</i> Nitric oxide suppresses permeability transition pore opening and enhances calcium uptake in mitochondria in vivo	3
<i>V.E. Dosenko, V.S. Nagibin, L.V. Tumanovskaya, A.A. Moibenko, J.Vaage</i> Postconditioning prevents apoptotic, necrotic and autophagic cardiomyocyte cell death in culture	12
<i>A.V. Dmitrieva, V.F. Sagach, A. Yu. Boguslavsky</i> The investigation of mitochondrial permeability transition pore (mPTP) In the development of myocardial and vascular contractility disfunctions	18
<i>I.M. Mankovska, E.V. Moiseenko, M.P. Demchenko, V.E. Dosenko, S.T. Zubkova, S.Y. Vargatiy, T.I. Muzichenko</i> Peculiarities of the human oxygen-transport system functioning after a long stay in Antarctic.	25
<i>M.N. Tkachenko, V.F. Sagach, O.V. Baziljuk, A.V. Kotsuruba, G.M. Popereka, L.G. Stepanenko, O.F. Senjuk</i> Age-related peculiarities of contractile vascular reactions and the content of free radicals of oxygen and metabolites of nitric oxide in BALB/c mice in conditions of alienation zone	32
<i>A.S. Khromov, I.V. Ivanova, A.V. Stefanov</i> Inhibition of nitric oxide synthesis during bacterial shock in rodents does not prevent development of resistant (decompensated) hypotension and death	42
<i>Iu. V. Danylovyh, V.A. Tugai</i> Influence of oxygen and nitrogen active compounds on pH value in uterus myocytes	52
<i>R.M. Lazarenko, A.P. Kondratsky, N.Ch. Pogorela, Y.M. Shuba</i> Alterations in ATP-dependence of swelling-activated Cl ⁻ current associated with neuroendocrine differentiation of LNCaP prostate cancer epithelial cells	57
<i>P.A. Nerush, E.M. Demchenko</i> Fatty-acidic content in cerebrum structures of hypothyroid rats of different age groups	67
<i>L.G. Kuleshova</i> Transformation of erythrocytes under hypothermia conditions as a diagnostic test for human vibration disease	73
<i>O.O. Goncharuk, V.I. Tsimbaljuk, Kostinskij G.B.</i> The peculiarities of operated nerve regeneration under subcompensated arterial ischemia and venous hypertension in experiment	78
<i>G. Ya. Koval'chuk</i> The influence of bioactive water «Naftussya» with the different microflora content on choleresis, water enteroabsorbition and diuresis in rats	83
<i>I. Limarenko</i> The comparative study of the new fluorine-containing guanidine-derivate compounds and pinacidil's influence on the contractile function of a urinary bladder in vitro	88
<i>S.O. Kovalenko</i> Analysis of the heart rhythm variability by the median spectrogram method	96
